# Introduction

Whether new or old to the craft, an iPod should give you trouble free service for years to come. This booklet has been made to familiarize you with the many functions of the iPod.

Herein lies an assortment of facts, tips, tricks, and general funny stuff. I have tried to include the most important info in a compact form. But don't be surprised to see some totally irrelevant stuff.

JP

# General Use

All controls are very easy to find and use. I am hard pressed to give a thorough description of each.

A. screen  
hmm...

B. menu  
navigates backwards through the menus

held down, it enables/disables the backlight

during a song you can navigate the menus

C. & G. arrows  
pressed once, they jump to the next song (unless the song is playing, then the left arrow will rewind the song), held down during a playing song they rewind/fast forward the song

E. select  
selects a menu item  
selects a song to play

while a song is playing, it toggles between time elapsed/remaining

F. wheel

rotate to scroll the menus

during playback it adjusts the volume

# Tips

## Scratches:

Cover the front (and back!) with clear contact sheet, or PDA LCD film

Sandblast the metal casing\*

Use a case. There are many brands/styles, look before committing. And do look at user forums - some have advantages/disadvantages which are not apparent.

## Headphone Jack:

Be careful with this - users have reported there has been some breakage here.

## Warranty:

Some stores will sell you a warranty. Make sure there are provisions for replacement, as this model will surely be replaced with a revision B.

## Ports:

Both ports will collect dirt/dust. Find something to block the openings. Either part of a firewire plug, or a store bought plug.

## Keep it Warm!

As with most batteries, keep the iPod warm. Cold temperatures will decrease the battery life dramatically.

## Use it as a Hard Drive:

Really. It is very convenient, more so than zips or floppies, even when small files are involved.

\*Will void your warranty.

# Tricks

Clever tricks to teach your iPod. Go ahead, it'll impress your friends, who needs an Aibo anyways?

Stay!

Sit!

Wag!

Beg.

Fetch!

Bark!

Lay!

Bad iPod!

Goodnight, iPod.

# Updates

Through user input, I plan to expand this booklet. Such things I may consider adding:

Diagnostic mode

Hacks/Mods

Care and Feeding - technical data

I originally wanted to showcase just the tricks here, but, it kinda grew.

# Disclaimer

“This booklet has been formatted to fit your iPod”

It, however, is not endorsed or made by Apple. The booklet has no affiliation with Apple Computer or any of its subsidies, divisions, etc...

Any harm an iPod should suffer, due to use or misuse of ANY method described, is the sole responsibility of the owner of the iPod. I cannot hold your hand, and make decisions for you.
